### A Radio Renaissance?

The radio audience in Western Canada which has suffered extensively for some considerable time, and in recent months in inarticulate silence outside the home, has at last some reason to hope that some of the disabilities under which it has been suffering are about to be removed, or at least ameliorated.

The grounds for these hopes are based on the recent public utterances of Major W. E. Gladstone Murray, the imported general manager of the comparatively new set up, the Canadian Broadcasting Corporation, successor to the erstwhile Canadian Radio Commission, on the occasion of his first trip to the west since his appointment, which coincided with the re-organization of the radio governing body of the Dominion.

A year ago radio columns in the daily press were filled with lamentations and the gnashing of teeth of radio fans whose complaints of interference, inadequacy of programs and other causes of dissatisfaction with the status quo swelled into a diapason of discontent.

To the average Western Canadian owner of a receiving set it appeared that very little head was being paid to his complaints and little or nothing being done to remedy them and that the only reply to his expressions of annoyance was to double his contribution to the commission for the privilege of listening in to what he did not want to hear.

Since that time the chorus of disapproval seems to have diminished somewhat but this must not be construed in official quarters that discontent has disappeared. It would be more correct to diagnose it as a demonstration of tolerance on the part of the Western radio public—a desire to give the new governing body an opportunity to study defects and disabilities in the hope that they will be able to remedy them and give the radio fans something more to their taste.

As intimated at the outset there is some reason to hope, in the light of Major Murray's statements that something is going to be done, and in the near future, to give Western Canadians a better break in the radio field than they have had hitherto.

It is true that Major Murray's public comments were entirely devoid of any information as to what steps will be taken precisely to remedy long-standing complaints but the general tenor of his published remarks indicated that he is fully aware of the causes of discontent on the prairies and an intimation that something is going to be done in an effort to more nearly meet the wishes of the listeners in this section of the Dominion was coupled with the interviews he gave the press.

The mere fact that recognition is given to the existence of complaints is half the battle and engenders a reasonable hope that solutions of some of the major problems are to be found within a reasonable time.

The following extract from one of his interviews shows that Major Murray has put his finger on some of the chief causes of annoyance to Western Canadian radio listeners.

"Major Murray expressed great interest in the difficulties of Western Canadian listeners to obtain their favorite United States programs through 'blanketing' of the southern stations by Canadian ones. He hoped a new allotment of wave lengths would follow, with special benefit to Canada, from the world conference on wave lengths to be held in Cairo in 1938. That conference likely will be preceded by regional conferences.

"Despite the existing wave length agreement between Canada and the United States, no agreement existed with Mexico and considerable difficulty was noted from that quarter. The C.B.C. manager also expressed his awareness of the difficulty of local listeners obtaining their favorite Canadian programs because of local programs by stations in their area.

"Major Murray said the average radio listener varied variety with a fair measure of better class music."

"He announced the intention of the C.B.C. to take part in a scheme of exchanging producers within the Empire and with the United States. He mentioned particularly proposed exchanges between the C.B.C., B.B.C. and N.B.C. It was wise, he felt, for Canadian program producers to widen their experience through visits to other countries and to let Canadians know what was being done elsewhere."

While the points mentioned by Major Murray do not by any means cover the entire ground, the very fact that he is quickly assimilating the causes of difficulties and objections in the west, is to say the least encouraging and his attitude indicates that he is anxious and willing to meet the wishes of the western audience, insofar as it may be feasible.

### Tribute To Dickens

125th Anniversary Of The Birth Of Famous Novelist Celebrated

In London

The 125th anniversary of the birth of Charles Dickens was celebrated recently in a London "werry changed" from the city the novelist knew.

Thaddeus Players marked the occasion by performing scenes from "The Tale of Two Cities" in the yard of the Old George Inn, a Southwark hostelry Dickens knew.

In a down-town restaurant, members of London's Dickens Fellowship dined and talked of the novelist over good English "wittals."

Sir Stephen Killick presided and two dramatists—John Drinkwater and Sir John Squire, paid tribute to Dickens' memory.

Ted tennis balls often are used toward the end of a late afternoon match since they possess greater visibility in the lengthening shadows.

### LEAPS OUT OF BED EACH DAY

Learns how to get primitive health. Now bounds with energy. No more sluggish, tired mornings.

Banish penalties of modern living. Get rid of tired, sluggish, bad taste, headachy mornings. Wake up peppy and full of energy. It's easy, you'll think it miraculous. Follow the example of thousands who have regained full health and energy with Fruit-a-Live. The unique prescription of a famous Canadian doctor. Fruit-a-Live cleanses the system of toxins and helps to bring normal, healthy liver action, stimulating the flow of bile and thus clearing the system—cleanses the elimination tract of wastes and poisons. Get rid of the blood of poisons and acids. Fruit-a-Live makes you feel better, gives you new health. So try Fruit-a-Live today. For sale everywhere. Cost 10¢, 25¢, 50¢. For your own protection, read this booklet, "Fruit-a-Live".

### Crippled Girl Is Clever

Blind For Years She Operates Typewriter And Plays Bridge

One of Ontario's most promising young persons lives in Tavistock. She is Lucille Kemp. "Babe" to her friends, blind, unable to walk and having normal use of only one finger on each hand. Miss Kemp is 19. She can write on a typewriter, run a telephone switchboard, read and write Braille, compose poetry, play an autoharp and enjoy a game of bridge.

When she was two years old, a swelling was noticed in one of her toes. The toe was removed on medical advice, but this failed to halt the progress of a severe type of arthritis which spread through her body, crippling limbs and totally destroying eyesight.

Her typing is done on a special machine made about three years ago by her father, who does woodwork and fine machining for a hobby. The keys are covered with brass caps in which are raised up Braille characters to indicate the letters. Miss Kemp was thus able to learn to touch and has become quite proficient; her friends tell of receiving letters from her at Christmas.

"There isn't anything else you can do?" the amazed reporter asked Miss Kemp after members of her family had gone over her various abilities.

"They forgot I can knit," she said. She produced her decks of cards to show how she plays bridge. Each card is stamped top and bottom with Braille characters to indicate its value. Even after the stamping has worn nearly smooth she finds no difficulty in telling what is in her hand.

### Scientific Research

Need For Greater Efforts Stressed By President Of Council

Necessity for greater efforts by Canadians in the field of industrial and scientific research was stressed by Major-General A. G. L. McNaughton, of Ottawa, president of the national research council, in an address to the Nova Scotia Institute of Science on the occasion of its 75th anniversary.

"We can by no means afford to regard the situation in Canada with complacency," he said, "but on the contrary we should use every endeavor to interest those concerned, and particularly our manufacturers, so that we may conserve what we have in the way of trade in our own markets and in the markets of the world in the face of the ever-intensifying competition from men, improved and cheapened products of other lands."

"We must put trained investigators to work to find other uses for our products in danger of being displaced, and we must find new products which can be made from available raw materials in order that stability of employment and of capital investment may be maintained, and particularly that the appalling waste and misery which comes in the trail of any decadent industry may be avoided."

### Robot Gives Warning

Officers Of Anti-Aircraft Brigade Testing Remarkable Machine

Officers of an anti-aircraft brigade at Manchester, England, are testing a remarkable machine which gives warnings of air invaders. The "predictor," operated electrically, records the speed of approaching airplanes, their height, and the speed and direction of the wind. The information passes by electrical cable to the anti-aircraft guns.

### Introducing The Office Cat

A notice on the bulletin board from William Allen White introduced Copy, a black tom-cat, to the staff of the Emporia, Kansas, Gazette.

"Mice are overrunning the basement. I have, therefore, decided to add to our already extensive equipment one double-cylinder, T-model, repossessed cat. Be good to the cat! Don't let him feed in the melting-pot and don't throw slugs at him for walking on the keyboards of our typewriters. The girls in the front office will feed him."

The Sahara desert is spreading southward at the rate of a half mile a year.

### HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or rectal soreness, do not neglect the same run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be sought at once. For this purpose get from any drugstore, a package of Hemoroid and use it as directed. This is the only safe and thoroughly reliable remedy for itching and sore piles. Hemoroid is a physician's prescription and it means the highest of folk for anyone who has wide experience in the treatment of piles. It is so pleasant to use may be had at such a reasonable cost.

### Coronation Medals

Plans For Official And Local Souvenirs Announced In London

The British minister of health, Sir Kingsley Wood, recently despatched an official circular to local authorities informing them of the revised arrangements for the supply of officially approved coronation medals.

The royal mint is to produce an official medal which will show the king's effigy on one side and the Queen's on the other. In addition there will be two classes of medals struck by the trade in this country.

The first will bear the officially approved double effigies of their Majesties on one side, with municipal coats of arms or other appropriate designs on the other. They will be described as medals with the officially approved portraits of their Majesties.

The second class will have both sides designed by private medalists, but arrangements have been made under which the portraits of their Majesties upon them may be "approved by the Federation of British Industries Coronation Medal committee acting in conjunction with the deputy master of the royal mint" and they may then be so described.

Supplies of all three classes of medals will, it is anticipated, be available by April at the latest.

### SELECTED RECIPES

#### CALIFORNIA BREAD

Temperature: 450-500 degrees F.  
Time: About 1 hour  
1 cup milk; 1 cup sugar; 1 tablespoon shortening; 1 teaspoon salt; 1 cake fresh yeast; 2 tablespoons lukewarm water; 1 cup Royal Household Flour; 2 cups Meala Whole Wheat Flour; 1/2 cup candied orange peel, chopped; 1/2 cup walnuts, slightly chopped.

Method: Scald milk; add sugar, shortening and salt; cool. Add yeast cake softened in lukewarm water. Add Royal Household flour and 1 cup Meala flour; mix thoroughly; continue adding Meala flour until mixture is stiff enough to knead. Turn out on floured surface and knead until smooth and elastic. Let rise until double in bulk; knead in orange peel and walnuts. Shape into a loaf and put in bread pan or small greased baking powder cans. Let rise. Bake in a hot oven for 10 minutes; reduce heat and continue baking. Makes 1 loaf. Entire time for making this bread is approximately 3 1/2 hours.

Recipe by Mildred Mae MacKinnon Copyright.

#### EGGLESS MAYONNAISE

3 tablespoons evaporated milk  
2 tablespoons lemon juice or vinegar  
1/2 teaspoon mustard  
1/4 cup Mazola  
1 teaspoon pepper  
1/2 teaspoon paprika  
1/2 teaspoon salt  
1/2 teaspoon sugar

Combine the dry ingredients, add the milk and gradually beat in the Mazola, then add the vinegar and beat until smooth. This dressing will keep indefinitely in a cool place.

### Printed In Error

Because Jubilee Stamp Was Printed With Wrong Color, Collector Makes Nice Profit

A young stamp collector made a profit of about \$1,500 (\$7,500) because three sheets of a 2 1/2¢ King George V. silver jubilee stamp were printed in error in Prussian blue, the wrong shade of blue.

The collector bought one of the stamps in a post office. Noticing the mistake, he bought the rest of that sheet and two other sheets. Then he approached a syndicate, which bought the stamps at \$5 (\$25) apiece.

Judge: "Your wife says you struck her, Uncle Tom. Have you any excuse to offer?"

Uncle John: "Ah suitinly has, Judge. While Ah was prayin' fo' rain fo' mah crops, she was prayin' fo' mah prayin' 'cause she was gwine to wash."

On the planet Jupiter, a year has 10,000 days.

### Move Alienates Sweden

Hitler's Decision About Nobel Prizes Sweeps Away Good Feeling

Chancellor Adolf Hitler's decision forbidding Germans to accept Nobel prizes in the future created a more unfavorable impression in Sweden than anything that has happened in Germany since the "purge" of June, 1934. By a stroke of the pen Hitler has swept away most of the good-will toward Germany built up by Dr. Joseph Goebbels' propaganda department in the last few years.

The official German explanation is scored and it is said that the mere fact that the Nazi government has taken this decision shows that it realizes that the prizes still constitute an important link between Germany and the outside world.

Even during the World War the work of the Swedish Nobel Committee, which awards the prizes for physics, chemistry, medicine and literature, was not interrupted, and Swedes remember with pride that they did more than any other people to prevent the world of science being submerged in the hatreds and suspicions of the Great War. Between 1914 and 1918 the physics prize twice was awarded to Germans and twice to Britons and in the same period the chemistry prize was awarded to a German, Briton and American.

Since 1901, when the first prize was awarded, nearly a quarter of all the prizes have gone to Germany.

### The Ideal Man

He does not speak out of others, even of his enemies, unless it be to themselves. He bears the accidents of life with dignity and grace, making the best of his circumstances, like a skillful general who marshals his limited forces with all the strategy of war. He is his own best friend, and takes delight in privacy, whereas the man of no virtue or ability is his own worst enemy, and is afraid of solitude. Aristotle in The Ethics.

London is the world's best-dressed city, says a German expert.

In smoke-infested areas, hogs are used to eradicate the reptiles.

### Build Planes In Canada

Big Boost To Canadian Aircraft Industry Is Anticipated

A big boost in the Canadian aircraft manufacturing industry is anticipated shortly as it is understood that if the Royal Canadian Air Force estimates are approved orders for airplanes will be placed wholly in this country. At present the Government plans to purchase more than 100 airplanes of various types. British designed aircraft will be built under license in Canada.

With British airplane factories working overtime to meet the unprecedented demand for fighting aircraft to place Great Britain on a parity with continental powers, firms in the British Isles are not in a position to accept orders from this side.

A short time ago Australia was compelled to place orders for aircraft in the United States owing to this reason.

### Tribute To British Design

Foreign Air Ministers Think 'Plane Best In World

Foreign air ministers and chiefs of staffs are coming to Great Britain to purchase British planes, which are now the best in the world. Viscount Swinton, secretary of state for air, told the Radio Manufacturers' Association. "That is about as good a tribute one can have to British design," Lord Swinton said. "I don't think we need be pessimistic about it."

It is possible to travel by canal from Antwerp on the North Sea to Marseilles on the Mediterranean, through the heart of France.

Adversity is the only scale that gives us the correct weight of our friends.

In the profane lexicon of the inconsiderate driver, there's no such verbage as "Pardon me."

# Transport Board Will Not Be Unfair Is Opinion Of Howe

Ottawa. Attacks against the transport bill before the senate railway committee during the past 10 days were largely on the ground the board of transport commissioners would be unfair. Hon. C. D. Howe, minister of transport, told the Canadian Club. He did not think there was any basis for assuming the proposed board would be unfair to any form of transportation.

The bill would convert the board of railway commissioners into the transport board and extend its jurisdiction to regulate inland shipping, highway and air traffic. The railway board, Mr. Howe said, had been penalizing the railways for many years and no one would say it had been unfair either to the railways or the public. Why should it be assumed the board would be unfair to other forms of transport?

It might be found advisable to make some changes in the bill, that was to be expected, the minister said, but he believed when it became law it would be a real assistance in helping to solve the transportation problems of Canada.

Railways had been faced in recent years with keen competition from bankrupt tonnage of the river shipping. Fully two-thirds of the canal-sized carriers brought over from the United Kingdom in 1927 and 1928 to engage in traffic on the lakes and St. Lawrence river in competition with the railways had never been fully paid for.

They were bought on initial payments of 10 per cent, and the buyers had failed to make any further payments. The builders were in England, the banks holding the collateral were in England. They saw no advantage in foreclosing and so the boats were being operated, often in out-right competition against the railways.

The object of the bill was not to interfere with the low rates now enjoyed by Canadian shippers or the efficiency of all forms of transportation at the present time but to seek to eliminate wastefulness.

## Trade Is Increasing

Canadian High Commissioner Pleased Over Business With United Kingdom

London. Hon. Vincent Massey, Canadian high commissioner over, expressed pleasure over the increased trade between the United Kingdom and Canada in an address at the engineering and hardware section of the British Industries Fair at Birmingham.

He expressed the hope the number of Canadian exhibitors at the fair would increase annually, adding that interest in the fair's possibilities was mounting in Canada.

Would Ban Enlistments

Ottawa. Notice was given by Hon. Ernest Lapointe, minister of justice, he will introduce in the House of Commons a bill to prohibit enlistment of Canadians in the Spanish conflict.

# British House Endorses Authorization Of Loan For Defence Purposes

London. A vote of 329 to 145 the House of Commons in committee stage approved the government's financial resolution to authorize a loan up to £400,000,000 (\$2,000,000,000) for defensive rearmament.

The vote came after two days of debate on the rearmament plan that calls for a total expenditure of up to £1,500,000,000 (\$7,500,000,000) over a five-year period. During its closing stages, as the opposition bitterly attacked the program, the fiery Independent Laborite, Jack McGovern, was ordered to leave the house for unparliamentary remarks.

Prime Minister Baldwin wound up the debate for the government. He reiterated the projected expenditure was solely aimed at ensuring the safety of Britain and the empire and enabling Britain to play its part in securing the peace of the world.

Baldwin emphasized there was no antithesis between collective security and national safety in answering opposition claims that Britain's vast rearmament plan was dropping collective measures.

The prime minister recalled a foreign policy speech by Foreign

## Suggest Special Instruction

For Treatment Of War Gas Cases In Canada

Ottawa. Suggestion has been sent to all universities in Canada having faculties of medicine that they instruct their medical students in methods of treatment of persons suffering from poison gas attack. Col. L. R. Lafitte, deputy minister of national defence, stated. Technical information has been sent to the universities.

The replies from the universities have not yet been received. The department takes the view that the doctors in Canada should be familiar with the most recent methods known to medical science for treating gas poisoning.

It is learned, although the department declined to comment on it, that commercial companies in Canada for some time have been testing out gases which might neutralize the effect of a gas attack if released during the attack.

## Pitchblende Deposits

Thirty-Year-Old Report Leads To Discovery Of Radium At Great Bear Lake

Ottawa. A 30-year-old sentence in a geologist's report sent Gilbert LaBine into Great Bear Lake to discover Canada's radium-bearing pitchblende deposits. Dr. Charles Cannell told the annual meeting of the Canadian Geographical Society.

The deputy minister of mines and resources described a trip he made 37 years ago with the late Dr. Macintosh Bell of the Geological Survey of Canada over the Great Bear territory. In his report, he said, Dr. Bell wrote:

"In the Greenstone east of McTavish Bay, occur numerous interrupted stringers of calc-spar containing chalcophyllite and the steep rocky shores which here present themselves to the lake are often stained with cobaltium and copper-green."

## Lost Comet Located

Tokyo. A Japanese amateur astronomer reported he had "located" the "missing" Daniel comet. Astronomers at Harvard University said observation of the Daniel comet could properly be called a rediscovery as it had not been seen in any of its predicted rotation periods since it was first sighted in 1909.

## Across The Border

Ottawa. Canadian National Railways porters operating on trains crossing the United States border are allowed to complete their runs by immigration authorities of both countries. Transport Minister Howe informed Hugh Plaxton (Liberal, Toronto-Toronto), in the House of Commons.

Factory-built television-radio sets will cost between \$300 and \$800, according to estimates.

## Debt Reduction Considered

Scheme For Alberta Patterned Along The Saskatchewan Plan

Edmonton. A debt reduction scheme, patterned along the general lines of the Saskatchewan plan which lopped \$75,000,000 from the farm debts of that province, is under consideration for Alberta. It was reported.

Preparation of an Alberta plan resulted from an interview between representatives of the Mortgage Loans Association and the provincial government.

One factor which calls for haste in its preparation is that the plan might have an important bearing on any debt reduction legislation which the government may intend to submit to the legislature.

The Saskatchewan plan, which might form the basis for the Alberta scheme, was announced in September, 1932. It cancelled \$75,000,000 of drought-area debts, one-third of the cancellations being borne by mortgage firms and the balance by municipalities, the provincial government and the federal government.

Estimated tax arrears of \$22,750,000 were cancelled under the Saskatchewan plan. Relief and seed advances also were wiped out. The interest rate on rural mortgage indebtedness was set at six per cent. all over the province, representing an annual saving to farmers of \$34,000,000.

Under the Saskatchewan plan, the province was divided into three areas—drought, marginal and the remainder. In the marginal area, debt adjustment was continued on an individual basis. In the rest of the province, individual adjustments have been made between mortgage firms and farmers.

It has been estimated the mortgage firms have written off \$6,400,000 in arrears so far under the Saskatchewan plan.

## Loan For B.C.

Dominion Million Dollar Loan To Finance Relief Expenditures

Ottawa. The Dominion is making a one-year loan of \$1,000,000 to British Columbia to finance relief expenditures. It was disclosed in an order-in-council tabled in the House of Commons by Hon. C. A. Dunning, minister of finance.

The loan, made under authority of the Unemployment Relief and Assistance Act, is to cover the province's share of direct relief.

As security, the Dominion is taking a British Columbia treasury bill bearing three per cent. interest payable half-yearly.

## Influenza Epidemic

Calgary. An epidemic of influenza has caused 37 deaths in Calgary during the past six weeks, medical authorities reported. The epidemic was believed on the wane, but there were still some 200 cases in hospitals and scores of victims in homes.

## Prisoners Of Soviet

Berlin. Germany demanded at Moscow that her diplomatic representatives be permitted to visit German citizens recently arrested in the Soviet Union, it was announced here.

## CONTESTS SEAT

Colonel Wodgewood Benn, prominent British Laborite and former Minister of the Crown, who will seek reelection to the House of Commons in the by-election to be held at Gorton, near Manchester, in a few weeks' time.

## No Foreign Enlistments

Canadians Who Join Foreign Armed Forces To Face Jail Terms

Ottawa. Canadians who enlist in foreign armed forces face jail terms up to two years and fines up to \$2,000 under a bill introduced in the House of Commons by Hon. Ernest Lapointe, minister of justice.

The bill supplants the Foreign Enlistment Act, passed by the British parliament in 1870, and is broader than the old legislation, being applicable to civil conflicts such as that in Spain.

Attention was drawn to the question by reports a few weeks ago that Canadians were being induced to join one side or the other in the Spanish civil war.

In the Canadian act, any person who attempts to recruit any person for service in a foreign force is guilty of a punishable offence, but foreign consuls, diplomatic officers and agents may enlist nationals of their own countries resident in Canada.

The act makes it unlawful for any Canadian to leave Canada in order to enlist in foreign armed forces.

## Volunteers Trapped

Thirteen North American Volunteers Killed Or Captured By Spanish Insurgents

Atlix. Thirteen North American volunteers with the government forces were killed or captured in an insurgent cut-throat. It was not determined if any were Canadians. In confusion of the continuing battle it could not be determined how many of them had been killed.

The North Americans were among 30 soldiers who drove their two trucks into the direct range of insurgent artillery near Valladolid, government outpost just off the Valencia highway.

Unaware insurgents had tunneled back two attacks, they found themselves trapped. They tried to reach safety but only three escaped. Those who were not moved down by machine gun and rifle fire were hustled off to Navacerrada as prisoners.

# Defence Program Strongly Supported In House Of Commons

## Motor Workers Strike

230 Employees Of General Motors Plant Make Wage Demands

Oshawa. More than 230 employees of General Motors plant here decided to strike until their demands regarding wages were met by company heads. The decision was reached at a mass meeting.

Metal finishers and other employees in the body plant laid down their tools just before finishing time. The strike affects an important part of the production line.

Objection was made to recent wage adjustments whereby the workers received approximately seven cents an hour more but were called on to complete five jobs an hour additional. They claim the old production level of 27 jobs an hour was high enough.

Harry J. Carmichael, vice-president and general manager of the firm, requested by the strikers to address their meeting, urged them to try the new schedule until the end of the month and if they were not satisfied then he would reconsider the question.

## Canada Shipping Act

Has Made No Apparent Effect On Freight Rates

Ottawa. The Canada Shipping Act has made no apparent effect on freight rates. Hon. C. D. Howe, transport minister, told the House of Commons, answering the following question by W. A. Tucker (Lib.-Ross): "What has been the effect of this act on freight rates, particularly on grain being exported from Canada?"

Under shipping laws, freight on passengers from one Canadian port to another Canadian port must be carried on Canadian vessels.

A practice had grown up, however, for United States shippers to carry grain for Montreal from the head of the lakes to Buffalo, then trans-ship for the Canadian destination. The act, proclaimed last August, was to prevent United States lines from competing by means of this practice.

## Canadian Shoes For Queen

Dozens Pair To Be Sent By National Retailers' Association

Toronto. National Shoe Retailers' Association in convention here decided to send Queen Elizabeth a dozen pair of hand-made Canadian shoes.

Size 4½. The shoes all will be made with continental heels. Three pairs of lattice-worked high-cut sandals will be made—one pair studded with diamonds and the others with rhinestones; a pair of patent leather pumps without stitching; a pair of white satin pumps; and others in red, silver, blue and gray.

## Aid For Flood Victims

New York. Canadian Army and Navy Veterans have offered \$10,000 to Harry W. Colmery, national commander of the American Legion, to be distributed as he sees fit to American war veterans in destitute circumstances due to the recent floods.

The offer was made through G. H. Garlick, secretary of the Quebec unit, Army and Navy Veterans of Canada.

## New Egg-Grading Method

Toronto. W. A. Landreth, Winnipeg, was elected president of the Canadian Food Producers' Association at the annual meeting here. Under a method agreed upon, eggs will be graded as follows: "A" large, 24 ozs. and over; "A" grade, 23 ozs. minimum; "B" large, 23 ozs. and up; "B" grade, 22 to 23 ozs.; remainder to be known as "C" grade. 2191

# Inquiry Into Taxation Will Cover All The Western Provinces

Ottawa. Answering Premier Aberhart's protest of any discrimination against Alberta in the proposed royal commission inquiry into taxation, Prime Minister Mackenzie King stated the inquiry would cover all provinces.

The prime minister sent the following telegram to the Alberta premier: "Replying to your wire. The intention, of course, is that inquiry by royal commission on taxation and financial relations shall cover all provinces."

Announcement was made in the House of Commons by Mr. Mackenzie King that a royal commission would be set up to inquire into Canadian taxation problems. An examination into the finances of Saskatchewan and Manitoba had been made as at their request by the Bank of Canada, he added, and pending the results of the commission's work assistance would be given those provinces by the Dominion.

Premier Aberhart, in a telegram to the prime minister, contended the assistance given Saskatchewan and Manitoba was discriminatory because his province had sought similar assistance from the Dominion and had been refused with the result Alberta had defaulted on its provincial bonds.

A similar protest was made by Rt. Hon. R. B. Bennett, opposition leader, in the house, who said Hon. C. A. Dunning, minister of finance, replied there was no intention to discriminate and the government "is prepared to sit down with any province and discuss its problems and bring forward such solutions as the circumstances may appear to warrant."

## LAWN TENNIS IS IN THE AIR PAGE MISS SUMMER

The above picture of the Davis Cup Draw in London will be greeted with enthusiasm by lawn tennis players as a sign that Winter is on its last lap. Sir Samuel Hare is seen (centre), presiding at the draw for the Davis Cup series at Admiralty House, London. Great Britain are the holders of the trophy, and twenty-odd nations have entered the 1937 series.

**NOTES AND COMMENTS**

"THE EASIEST thing in the world to do is to spend somebody else's money, and it must be very pleasant, judging from the number of people who vote for it." This quotation is taken from an address by Senator Carter Glass of the United States. It was brought to mind by a conversation recently with a property holder here whose taxes represent a big share of the local assessment.

OFTEN the most reckless spenders of public funds are those who contribute the least, and thrifty individuals are "soaked" under the guise of levying tribute on the so-called capitalist. This is liable to increase to an alarming extent under the provincial administration radical element which having already partly wrecked the credit and financial structure of the province, will complete the job if they gain control.

TAXPAYERS should watch the controllable expenditures and clamp on the safety valve by vigorous protests when they find that extravagance is creeping in. The people want economy, not waste; work, and not relief [except the racketeers]. One of democracy's weaknesses is that public opinion seldom becomes aroused to serious evils until the damage has been done.

MIXED comment was heard on the picture "Green Pastures" at the Palace theatre. It depicted the negro's conception of the creation, the destruction of the world by flood, the rise and fall of Babylon and finally the Saviour sacrificing his life for the sins of the world. Some criticized the picture because it smacked off mockery, such as "De Lawd" giving Noah a good ten cent cigar because he was pleased with him, and the angel Gabriel recording in his book that one of the angel's wings was moulting, and "De Lawd" telling him to do something about it. Another amusing incident that relieved the seriousness of the play was Gabriel, on being told to go and push Satan over the brink, remarking that after he had done it he would spit in his face.

IT DEPENDED on the viewpoint how one regarded the play. If he remembered that here was a negro Sunday school teacher, trying to impress on the picanninies the good and evil in the world, and how God dealt with his great plan, then it must be adjudged a masterpiece. If, on the other hand, one could only see mockery in the sincere efforts of the Sunday school teacher, then the point of the story was entirely missed.

HAVING FOSTERED senior hockey in Southern Alberta, for several years, Coleman's right to the play-offs should carry some weight. Yet at this writing the local club receives a snub from the A. A. H. A. executive in their ruling that games between Luscar and Canadians shall be played at Edmonton and Lethbridge. Hockey fans have given support, the coal companies have employed hockey players, and the local executive has given liberally of its time towards promoting the game here. This apparently goes for naught when a few of the higher ups play into the hands of other interests. Their action evokes a well justified storm of protest from Coleman and the Pass towns.

**Alex Morrison Writes**

From Los Angeles come a welcome letter, from Alex. M. Morrison, who with Mrs. Morrison is spending a two months vacation in California. He states: "We are enjoying the mild climate, although they say it is an exceptionally cold winter. There are a few bathers on the beach every day."

The McLeans left on Feb. 17 and expect to arrive home about March 1. We have been staying at Long Beach for over a month, and intend to stay another month, after which we will travel back via San Francisco and Vancouver, reaching home sometime in April."

Mr. Morrison comments quite freely on local happenings which he reads of in The Journal, and though away on holidays for the benefit of his health, he maintains a lively interest on all that goes on.

**Reducing Relief Grants**

The federal government is very properly cutting down relief grants. The provinces will have to do the same. So, too, will the municipalities. The latter will have the job of cutting the garment according to the cloth, but the funds available will suffice if the undeserving are pruned loose from the relief rolls. The public may be assured that the Federal government would not take this step were it not forced by the exigencies of the case the absolute necessity to cut down its own expenditure and encourage subsidiary governments to do the same. Some time before long it will be forced to cut down another relief appropriation—that which goes to national railways.

### Empress Winter Golf Tournament

While the rest of Canada is shovelling itself out of snowdrifts, Canada's only mid-winter golf tournament of an international character will be held on the Royal Colwood Golf Club Course at Victoria, B.C., from March 1 to 6. This is the annual Empress Winter Amateur Golf Tournament, now in its ninth year, which brings well on to 200 enthusiastic golfers from Canada, the United States, and Europe into competition for a large number of valuable prizes, including the Sir Edward Beatty Challenge Cup, Chamber of Commerce Trophy, Victoria Rotary Club Rose

Bowl, and Matson Inter-District Team Cup. Favored by summer-like weather, the tournament is the high-water mark of the social season for the winter colony on the sunny southern tip of Vancouver Island. Victoria will be in festive mood for the event, while Colwood's beautiful clubhouse and the regal Empress Hotel, with its gardens, conservatory, and Crystal Garden swimming pool, will form an ideal background for the colorful social activities which mark the six days of tournament play. Included as added attractions will be a dinner

### Interesting Notes on Local Sports Activities

Blairmore Curlers Repulse  
Coleman Challenge

Blairmore curlers, led by Milt Congdon and Harvy Carmichael, repulsed the challenge of Coleman curlers, led by Jim Kerr and Bill Hoggan, for the Burns' Cup, emblematic of club supremacy in the Pass, on Sunday at the local arena. Kerr led Congdon home by a 10-7 score to give the locals a three point lead but Carmichael gave the Hoggan rink an artistic trimming, winning 21-4 to erase the Coleman lead and give the Blairmore clubs a 28-14 decision in the two games, to retain the cup.

Personnel of the teams were: J. Jacomuzzi, A. Fantin, R. Rinaldi, M. Congdon, skip; H. Mansen, H. Blake, W. Evans, H. Carmichael, skip; A. Dow, A. Gentile, J. Emmerson, J. Kerr, skip; F. Antrobus, H. Harris, H. Boulton, W. Hoggan, skip.

D. P. McDonald, president of the A. A. H. A., wired the local executive on Monday evening to agree to play Luscar at Calgary and the second game and third if necessary either in Edmonton or Lethbridge. Messrs Rippon and McBurney wired a reply that they were willing to play the first game at Calgary but the second and third games were to be played at Coleman.

Jimmy Joyce is undoubtedly the season's hard luck player on the Canadian team. On Friday against Brandon he collided with an opposing player and suffered a cracked rib which is keeping him off the ice for a few days. During the year he has suffered slight concussion, an injured leg and numerous bruises.

Nelson Maple Leafs are leading two games to nil in their best three out of five game series with Trail in the East Kootenay play-offs. The third game takes place at Nelson to-night. Mickey Brennen was out of action Tuesday evening at Trail owing to having suffered several cracked ribs in the first game at Nelson last Saturday.

Several local short wave radio fans listened in to the Santa Anita Derby on Monday at 5.30 p.m. Added interest to the listeners was the entrance of two Vancouver horses; and two Alberta

## Building Material

## Money For Improvements to Your Home is Now Available

### Under the Home Improvement Loaning Plan

A nation-wide co-operative effort under authority of the Dominion government, enable loans to be obtained at 3½ per cent. for home improvements, installing heating plants, bathrooms, kitchen fixtures, new fences, and a wide range of general home improvements.

EXCEL BUILDERS SUPPLY CO. will gladly co-operate in this plan, and will supply all Builders Materials, including Doors, Windows, Paints and Hardware. Plumbing and Heating also installed under the above plan.

No Liens, Mortgage or other security required. We are prepared to co-operate to the fullest extent and will help to solve your house problems by planning and estimating. *Call and talk this over with us.*

This plan enables the property owner to improve his property and increase its value without financial strain.

## Excel Builders Supply Co.

jockeys, Saunders and Longdon, had mounts. Clem McCarthy, famous commentator, gave a word picture of the race and its exciting finish. The race was worth \$50,000 to the winner.

Two Hillcrest teams, boys and girls, invaded Coleman on Monday evening and defeated two local high school teams.

### It Was Our Fault

In a report recently of a telephone bridge for St. Alban's church, the names of Mrs. Jack Richards and Mrs. H. E. Gate were omitted, they having five tables at the latter's home, and the church funds benefitted to the extent of \$5.00 from the players.

Until they have a law that limits the amount of taxation that can be assessed against a home, our building trades are going to languish. Homes are sacred to many families, whether in city, town or country, and home owners make the finest type of citizen, but high taxation and insecurity of tenure, has weaned people away from their natural love of home.—Pincher Creek Echo.

## WORLD HAPPENINGS BRIEFLY TOLD

The House of Commons committee on the Elections and Franchise Acts rejected a proposal to make election day a public holiday.

Major-General Sir Frederick O. W. Loomis, D.S.O., C.M.G., K.C.B., was commanded the 3rd Canadian Division at the close of the Great War, died recently in Montreal.

Naval Minister Mitsumasa Yonai told the diet Japan has "no intention of building up her fleet to equal those of the world's strongest naval powers."

The reconstructed Bank of England—repository of the nation's gold—is being built to last 1,000 years. When completed, experts say it will be virtually impregnable and the strongest building in the empire.

An increase of 86,698 in the world total of scouts during 1936 in the 49 countries recognized by the international committee was reported at a meeting of the council of the Boy Scout Association. Total membership was 2,592,832.

The Royal Canadian Mounted Police was "thinking of installing" radio equipment in patrol cars. Major-General Sir James H. MacBrien said on his arrival in Halifax on an inspection tour of Nova Scotia detachments.

Importance of increasing agricultural production in the United Kingdom in order to reduce the load on shipping and the navy in the event of war was stressed by Sir Thomas Inskip in addressing a farmers' club at Fareham, Eng.

Canada's transportation problems are too varied for any immediate short-cut solution, Hon. C. D. Howe, minister of transport, told a Board of Trade banquet. He believed the Dominion had too much in transport facilities for its present needs.

## Wonderful New Marigold

Has Been Developed From Wild Flower Found In Tibet

A Tibetan missionary is credited with introducing to gardens of the civilized world a new race of marigolds, which differ from all others in having foliage completely free from the characteristic marigold odor, which many dislike.

Seed of the wild Tibetan flowers supplied by the missionary were taken in hand by an American expert plant breeder, and a hybrid variety, much larger and more beautiful than the wild type, but with equally odorless foliage and a really fragrant flower, has been awarded the All American gold medal as the best flower seed introduction for 1937.

The story of the development of this new flower is romantic. It proves that there is still a field for plant explorers. The marigold found in Tibet had escaped discovery by botanists, apparently. When its seed was sown in California, it produced weed-like flowers. Their only distinction was the lack of marigold odor. Fortunately this merit was recognized and steps were taken to improve the flowers. Crosses were made by the hundreds, with other marigolds, and among all the plants which resulted, one was found which had the promise sought.

It bore a flower of a new form; more like a chrysanthemum than a marigold, with the central petals surrounded by a collar of broad petals. In color, it was golden; height, 2 feet; it flowered early and bloomed all summer.

Collarete Marigold Crown of Gold is the official title of this new flower, which is not only lovely in itself, but holds forth bright promise for further advancement in marigolds, and a revived interest in fragrant flowers.

"Is your husband better, Mrs. Meadows?"  
"Yes, thank 'ee, sir; it don't take him long to vituperate."

Angora cats are the largest of pet cats known.

## PANTIE-TROCK FOR ACTIVE KIDDEES INVITES HARD WEAR

By Anne Adams

With Spring well on its way, you'll want to make sure that your young "mischer" has plenty of fetching school and play frocks for the sunny days ahead! And clever mothers everywhere will immediately recognize Pattern 4326 as being just the fashion model that will please a saucy-wide Two or Ten year old. Any youngster will just adore the long-wearing and comfy matching panties that accompany this easy-to-make pattern and enhance its practicality. Anne Adams well knows the youthful flattery of a pointed collar topping a bodice that wears buttons back and front. And what kiddie would not welcome the fun of choosing between dainty puffed or flared sleeves? For fabric, select a fast-color, washable cotton.

Pattern 4326 is available in sizes 2, 4, 6, 8 and 10. Size 6 takes 2½ yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

## Exhibits From Canada

Many Things Were Shown At British Industries Fair

Bigger and better than ever, the British Industries Fair opened in London and at Birmingham Feb. 15 with exhibits from many countries, including Canada.

Buyers from 69 countries attended the fair which was first inaugurated in 1915. Canada was exhibiting at the Olympia section of the fair in London and also at Bromwich castle at Birmingham. For the first time there was also a special Canadian section at the textile and furniture exhibition at the White City, London.

At White City, 24 Canadian firms showed their textile and furniture wares and at Birmingham—the hardware, engineering and metal industries section of the fair—there were eight Canadian firms represented.

The fair, which ended Feb. 26, coincided with the launching of the "Canada Calling" campaign at Birmingham.

Australia and Antarctica are the only two continents that have no land connection with other continents, and are the only continents that lie entirely south of the equator.

The sun varies in brightness over an 11-year period as the sun-spots wax and wane.

## Remembers Accident

Man Once Knocked Princess Juliana Down With Bicycle

Arie Schilder, now a resident of Pelee, Iowa, took a personal interest in the marriage of Princess Juliana of Holland because he once knocked her down with his bicycle.

The accident occurred in July 1912, when Juliana was only three. Schilder lived at Apeldoorn, where he was delivery boy for a meat shop. The royal family had gone to their summer place at T'loo, just adjoining Apeldoorn.

"I was riding by the palace, on my way to make a delivery," Schilder recalled.

"I guess I must have been thinking about the dangerous wild boars that Juliana's father kept on the estate for hunting, because I failed to notice a little girl playing with two tame goats in the road."

"When I saw her, I tried to stop, but my bicycle struck her and knocked her down."

"Two nurses came running from the palace, followed by soldiers and bodyguards. Little Juliana was crying, but it was found she was uninjured except for a small cut on her knee."

"The guards surrounded me and I thought sure I would be taken to prison. But they finally let me go."

Schilder said that Juliana was so adored by the Dutch population that as soon as word of the accident reached town, his friends wouldn't speak to him for days.

## Title For Premier Baldwin

Likely To Be Rewarded With Earldom On Retirement

When Prime Minister Stanley Baldwin retires—which may possibly be after the coronation of King George VI. in May—he will be rewarded with an earldom for his services to the nation, the Sunday Referee said.

The newspaper said it had this information "on the highest authority." It said he probably would take the title Earl of Bewdley, that being his seat in Worcestershire.

Italy plans to build 1,700 miles of road in Ethiopia within two years.

## JACK MINER AS AN HORTICULTURIST

By Orville H. Dodge

Jack Miner examining a plant known as the Mallow which through cultivation has it so it is blooming twice the ordinary size.

It is true that Jack Miner's fame as a bird-lover has spread abroad, attracting as it has, thousands of birds and people to his bird sanctuary. But there is one branch of his work which has only been touched on by a few, namely, his investigation of tree and plant growth.

One newspaper recently termed him the "Luther Burbank of Canada," to which comparison he, with his modest smile, remarked: "That was going it a little too strong."

As one approaches his residence, it is easily observed that the front of his property, which is one hundred and twenty rods in length, is planted with flowers of many varieties, some of which have been bought and planted by him, others sent to him from unseen friends all over the continent.

When I asked him why he planted these beside the public highway, I was told: "There are so many automobiles passing that, rather than let the roads to keep down the dust, I beautify the side of the road with such fragrant and beautiful flowers which every intelligent person who admires beauty at all will slow down in order to see them. As a result, they raise no dust."

While Jack Miner's property consists of but thirty acres, three of these are occupied by the ponds of water. The balance is reforested and planted with flowers and shrubs on the growth of which the naturalist has done considerable experimental work.

Among the trees planted on the sanctuary, there are thirty-five thousand Scotch pines, which, being green, provide shelter and protection for the quail and insectivorous birds in the winter. Thousands of red cedar trees have been planted, which produce a little blue berry containing seeds that furnish excellent food for such birds as grosbeaks and cedar waxwings.

So much appreciated has the Jack Miner study of trees been that Government officials of the United States have offered him a handsome salary to tour the States lecturing on the methods and value of reforestation to the country. Officials from both Canada and the United States visit the Miner property usually to see the plan followed there.

## Tailor Shares Honor

Furnished Edward VII. With First Pair Of Creased Trousers

A Karlsruhe reach-me-down tailor claims to share with Edward VII. the honor of inventing the crease in trousers.

When King Edward, as Prince of Wales, was paying one of his many visits to Karlsruhe, his trousers were badly torn in some way while he was walking in the town a long way from his hotel.

He was obliged to go into the nearest ready-made clothes shop and get a pair in which to continue his walk. Those selected had been a long time at the bottom of a large stack, and in consequence had become creased down the middle.

In this way they had lost the tubular appearance characteristic of the garments of that period. When the Prince reached the promenade near the Spa Hotel, the fashionable crowds noticed with amazement the new style of trousers. They became the vogue overnight, and trousers have been creased ever since.—London Daily Telegraph.

## Royal Naval Review

Home Fleet Will Be Brought Into The Thames For Coronation

The home fleet will be brought into the Thames for the Coronation.

It was announced that battleships will leave off Southampton and destroyers and submarines in "London Pool" and near London Bridge. They will be berthed there May 7-13, after which they will sail for the royal naval review May 20 at Spithead. Squadrons to be anchored off Southampton of the second battle fleet include the Nelson, Rodney, Royal Oak, Resolution and Ramilies. They will be accompanied by the aircraft carriers Courageous and Furious.

The smaller vessels will include the new cruisers Southampton and Newcastle. The ships will be open to public inspection.

Teacher: "An abstract noun is something you can think of but not touch. Now give me an example." Bright Pupil: "A hot poker."

## SUNDAY SCHOOL LESSON

FEBRUARY 28

### THE NEW COMMANDMENT

Golden text: A new commandment I give unto you, that ye love one another, even as I have loved you, that ye also love one another. John 13:34.

Lesson: John 12:12-13:38. Devotional reading: I Corinthians 13:1-13.

### Explanations And Comments

The New Commandment, John 13:34, 35. A new commandment I give unto you, that ye love one another; even as I have loved you, that ye also love one another. By this shall all men know that ye are my disciples, if ye have love one to another. There are other tests of Christian discipleship which we might feel inclined to put before that one. The orthodoxy of belief, the consistency of conduct, the earnestness of efforts to extend the kingdom—these and many other tests have been applied while the one great test given by Jesus has been forgotten. As far as the story is told in the Gospels, Jesus never spent much time inquiring into the details of any man's belief, but he was intent upon discovering how men felt toward their neighbors and how friendly and helpful they were in their relationship with them. The size of brotherliness and selfish neglect of others were the sins he condemned most often.

Here is the truth in a little cove, though for all the ways we go: In Love is all the Law we need. In Christ is all the God we know. (Edwin Markham.)

### No Good To Astronomers

Total Eclipse Of Sun Follows Nearly Landless Course

The longest total eclipse of the sun in more than a century will occur June 8, but to astronomers it is likely to be a total loss. The sun will be hidden completely for seven minutes and four seconds, nearly an all-time record. Yet, scientists who last year scurried to points all the way from Greece to Japan to study a mere 2½ minute eclipse expect to pass this one up. The reason is that it will follow a nearly landless course through the South Pacific, missing islands as effectively as if guided by a master mariner.

The eclipse will start in the Fillice and Phoenix archipelagos, near Samoa, where the sun will rise entirely obscured. A rare sight to the layman, this means little to the astronomer because he cannot effectively photograph an eclipse close to the horizon. As the sun climbs into the sky, the path of totality will cross the South Sea and it reaches Papeete, Tahiti, near Oahu, the ancient Inca capital, there will be a totally eclipsed sunset. Hawaii and Mexico will see a partial eclipse and a very slight dent in the sun's disc will be visible in the southwestern United States.

From New Zealand to lonely little Canton Island will go an expedition under C. B. Michie to await the eclipse in its four-minute stage. Los Angeles' Griffith Observatory considered a trip to Christmas Island but that that island actually lies in the path of totality has about caused Director Dinsmore Alter to give up the idea.

The isle most favorably located in the path of totality is Enderbury, an uninhabited atoll in the Phoenix group. There is no anchorage and landing is dangerous. The isle most favorably located in the path of totality is Enderbury, an uninhabited atoll in the Phoenix group. There is no anchorage and landing is dangerous.

## Rare Coins

British Columbia Once Had A Mint Of Its Own

Among the world's rare coins are ten and twenty-dollar gold pieces turned out by the British Columbia assay office in 1862. The rarity of these coins is explained by Eric J. Fulton in an article on the Royal Canadian mint published in the current issue of The Canadian Banker.

Gold was discovered in British Columbia in 1857, when the province was a crown colony. The governor applied to the home office for authority to open an assay office. This was opened in 1860 in Vancouver. The following year permission was given to extend the operations of this office and to coin gold in ten and twenty-dollar pieces.

In 1862 some trial pieces were turned out, but after striking these few pieces, the workers decided to do some striking on their own account and demanded higher wages. The new mint was accordingly closed and the strikers were soon digging for gold instead of minting it.

Some specimens of these 1862 gold coins are still in existence. They have more than once been offered for sale at from \$8,000 to \$10,000 each.

### Deferred Payment

Dated July 1, 1962, a receipt for part payment of a sum due Charles H. Goldman for making his crown jewels—some of which will be used at the coronation of King George—has been presented to the British museum by Lord Cromer.

## If You're Told to "Alkalize"

Try This Remarkable  
"Phillips" Way  
Thousands are Adopting

On every side today people are being urged to alkalize their stomach. And thus cause symptoms of "acid indigestion," nausea and heartburn.

To gain quick alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA—30 minutes after eating. Or—take two Phillips' Milk of Magnesia Tablets, which are almost instant effect. Relief comes almost at once—usually in a few minutes. Nausea, gas, fullness after eating and acid indigestion pains leave. You feel like a new person.

Try this way. You'll be surprised at results. Get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Delightful to take and easy to carry with you. Only 25¢ a box at all drug stores.

### Also in Tablet Form

Each tiny tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

MADE IN CANADA  
**PHILLIPS' MILK OF MAGNESIA**

## Gardening

Winter may linger or even return again later on, but the person who is determined to have a real garden this year is already making plans. After all, a garden is very similar to a house or a library, it must be dreamed over and planned well in advance of actual operation. In the enjoyment and usefulness in gardening, it is a pleasure to be derived. Varieties will have to be chosen with the most care. A good arrangement perhaps for getting seed started indoors. All of these things take a little time and it will be time well spent.

All that will be needed for these preliminary plans will be a pencil and paper, and a good seed catalogue. If a government bulletin on "Gardening" can be added, so much the better. The catalogue, however, is indispensable. It should be of Canadian origin, because the seeds and directions listed therein have been tested with our own Canadian climate in view.

Catalogues to-day are more than mere lists of flowers and vegetables. Much other valuable information is given. For instance, along with each flower there is a description of color, height, time of blooming and some indication whether the variety is frost resistant and if it is suited to sun or shade. All these points will prove of value to the gardener. To the beginner, if a mixed border is to be laid out, it is important that the smaller plants be placed in the front, and one will want to know in advance whether the colors are going to match. Time of flowering, too, a good information to have because knowing that, it is possible to plan the time of bloom right through the season.

According to horticulturists, most dainty flowers are early growers. Perennials, fruit trees and other plants which winter outdoors. Warm weather plants are early growers. The North or West, a responsible variety, slightly but better, under a light covering of straw, leaves or even old newspapers for a few weeks until Spring really arrives. Nature's own protection, snow, is often absent.

## Men Better Inventors

Have More Ideas Than Women About Large Things

Woman has not, apparently, as inventive a mind as man.

Out of 7,791 patents issued in Ottawa by the commissioner of patents last year, only 58 were made by women. Slightly less than the year before when of a total of 8,713 only 52 were issued to women.

Investigation showed women's minds do not invent large or important things but rather little kitchen-knacks, kitchen utensils, brushing and scrubbing machines, dress improvements and knitting and tatting instruments.

Donald—"My mother's awful funny."

Thelma—"Why?"  
Donald—"Well, when we have mince pie or frosted cake, she asks if I want some; but when we have spinach she just gives it to me."

Politician—"My boy says he would like a job in your department."

Official—"What can he do?"  
Politician—"Nothing."  
Official—"That simplifies it. Then we shan't have to break him in."

## Thou Shalt Not Love

— A NOVEL BY —

GEORGIA GRAIG

CHAPTER XVII.—Continued

And where did this mysterious note fit into the mad scheme of things? Someone else knew the secret of her impending doom. From that one moment's touch of the heretic writing, it must be someone who had been watching her since those terrible days in Egypt. Someone who knew! That was a disquieting thought. Who?

At the time of the opening of the tomb, newspapers all over the world had printed the story of Tut-Amun-Ra and the famous curse. They had referred to it as one much more bitter than other curses which have time and again been found in other tombs. They had made this story one with a touch of romance, of how Tut-Amun-Ra was reaching out from the grave to protect the priestess he loved.

But all that was such a long time ago! Surely everyone by this time had forgotten. . . . Except Starr! Ellison, who had such good reason for remembering.

It had been sensational news at the time, but sensational news dies quickly. Starr did not believe there was a soul alive who could have recognized in the girl who flashed so brilliantly across the horizon of New York's night life, the supposed author of a ribaldry sensational book, as that other haunted creature who had fled from Egypt in terror.

Someone must have, though, or he was waiting all the time. For now she was discovered. Somebody knew who might tell Michael!

As she moved like one in a bad dream from her living room on into the bedroom, Starr, looking into the mirror, saw with her own eyes how she had changed. Facing her was not the woman who had tramped country lanes in a pair of overalls with her bridegroom. Here, once more, was the girl who had indulged in a restless round of parties in an attempt to forget her dream of the unknown. The same woman who had taken sleeping powders at night to dull the agony of that over-present "Thou Shalt Not."

She cried out defiantly to that slender, frightened girl in the mirror:

"It shan't hurt me! It shan't! I'll fight!"

But, oh, how she needed Michael's arms to give her courage!

The next morning's mail brought another of the anonymous notes. This time Michael turned it over to his wife without a word. Starr accepted it, her long black eyes a mute plea for his understanding, his sympathy. She did not get either. Michael's handsome tanned young face was as hard as a rock.

She could not open the letter under the forbidding glances of his stern, accusing eyes. She slipped it, unopened, into the pocket of her black satin lounging pajamas, not realizing how guilty that very action might appear to a jealous husband.

That was how it went, with the child between them growing, the misunderstanding rearing up like an impassable wall. Every few days brought another letter—always at breakfast time—when Michael was there to see and to pretend to read.

His table with no comment except his bitter unspoken ones.

All the letters were couched in the same terms. Each one impressed

## WOMEN WHO SUFFER

WOMEN who suffer in silence often pay a double penalty for veiling this sign of unhealthiness or silly pride. Painful periods are nature's warning that something is wrong and needs immediate attention. Growing girls as well as women in middle life are often sufferers from female irregularities. They find Dr. Pierce's Favorite Prescription is a dependable tonic. Read what one writes: "Roulet, Route 4, Embury, Ont., said: 'I was suffering from female irregularities. My strength was completely gone. It was impossible for me to get on my feet. I was unable to take Dr. Pierce's Favorite Prescription and in a short time I was feeling like again.' New York, N.Y. Nov. 1917."

Tears sealed the envelope. Now Michael would not look for her! Starr was to have her Egyptian apartment, without a single good-by glance at the place in which she had known so much of joy—and of tragedy—to finish her battle alone.

CHAPTER XVIII.

A young woman sat in a comfortable chair in the doctor's office, fac-

ing the sun that streamed through the blue-velvet-curtained windows and made warm patches on the rug. The branches of the tree outside tapped against the pane. Bare branches. It was December.

The girl—woman who sat there quietly while the pleasant-faced physician studied her, tapping his fingers together contemplatively, was a slim, quiet creature, with delicate features above the deep collar of her thrown-back fur coat. Features like a cameo carved out of ivory. She wore a simple dark suit beneath her luxurious fur coat, and tendrils of midnight-hued hair escaped from beneath a small black felt hat tilted over one eye.

Her eyes were the most striking part of her; what was noticed from the second she came within one's vision. Beautiful, long, black eyes that had a hint of the exotic as of some other race. Her hair, but they burned with a bright, unnatural light, as though they had looked upon strange, unearthly things remote from the consciousness of the everyday mortal.

When she spoke, her low, cultured voice raved in the desperate manner of one who is anxious to know the worst, and to know it with the least delay.

"I don't suppose you'll remember me, Dr. Morgan," she said, "but I came to you some time ago, in September. You told me then that I hadn't six months to live. So much of my time is already gone, and I feel if there was a mistake, at all, it was in giving me too great relief. I want your opinion again. I want you to tell me truthfully what chance I have—just how much longer I can expect to live." Her voice was brave, her carriage gallant, but on the last words the voice faltered pitifully.

The doctor looked deep into her haunted eyes. He said slowly:

"I remember. I recall you quite well. You may not remember that I asked you a good many questions, and that you answered them—if you did answer in a straightforward way as if you hardly knew where you were answering at all. Mechanical answers. Enough for me to understand." He nodded. "Yes, you are the girl who went on that expedition to Egypt—with the two men who died so shortly after, and there was much talk of why they died. . . . I remembered reading in the papers all about it, and the romantic tales that were told, as soon as you told me you were Professor Ellison's daughter. You told me of her death, and the fantastic notion that all those stories were real, that some ancient curse was laid to wipe out your and your whole family."

Starr's heart was suddenly beating like a trip hammer. She gripped the arms of her chair, staring at the tall, gray-haired doctor.

"But—but you told me—"

He smiled a little wryly, his eyes studying hers.

"I started to tell you," he remarked slowly, each word boring in, "that you wouldn't live another six months if you didn't shake yourself out of your morbid depression, come down to earth and realize that you were living in the Twentieth Century. Your own state of mind was killing you. Your nerves were shot to pieces. You were so sure that you were doomed that nothing could make you believe differently. You would have known that if you could have recognized with what passion you told that weird story of yours when I managed to draw it out of you. I wanted to advise you to find some vital interest in life, something to which you could cling, something to make you forget the past, and all the terror you had seen in that Egyptian tomb. . . . He shook his head. "What a place to take a sensitive young girl! Not of course," he added that quickly as he saw a flash of resentment in her eyes. "that I am in any sense criticizing your father. He merely could not understand, of course, and wished you to have the same enthusiasm for Egyptology that had given him no much pleasure during his life. That is understandable, but—Well, with him dying so shortly afterward, it certainly left you in about the most perilous state of mind I have ever seen in any young girl. I wanted to tell you so, advise you what to do, but you didn't seem to hear half of what I was saying. I hadn't even got around to prescribing a tonic when you rushed out of my office like one possessed."

## HIS BACKACHE WAS UNBEARABLE

Kruschen Brought Him Relief From Pain

This man of 21 was prematurely aged by backache, when he should have been enjoying the best years of his life. Here he tells how Kruschen helped to restore him to health, after months of pain—

"I was in hospital for ten weeks, discharging to kidney trouble. When I was discharged I felt like an old man, although I am only 21. If I stopped to do anything it was agony to straighten up again. Several people advised me to try Kruschen tablets. I tried them and found they gave me relief from pain and I felt better in every way. I cycle 25 miles a day to and from work, and shall keep up the daily dose of Kruschen because I can now do the journey to and from work and not feel any the worse for it." S.V.C.

When the internal organs cease to do their work properly, impurities build up and accumulate in the system, causing troublesome symptoms. Kruschen Salts help to stimulate the liver and excretory organs to healthy, regular activity, and thus assist them to rid the system of harmful impurities.

### To Welcome Visitors

London Newspaper Urges Englishmen To Take Care Of Overseas People At Coronation

In a leading editorial in the London Times the Englishman is scolded for his habitual inhospitality and requested to make himself in welcoming the visitors from overseas expected in London for the Coronation.

Visitors are coming in "astronomical figures greater than anything known in the history of the Empire," the Times declares, and adds that "it was the duty of the Englishman to make the arrangements should be made for the entertainment and happiness of many returning home for the first time and many of the second generation who have never seen England."

It is not well to boast too freely of one's own country, but the people of London over palm and pine trees and those who live under maple, kauri and eucalyptus are to be treated as impersonally as if they themselves were trees walking," the Times remarks.

Most of them will have deep, almost embarrassing, sentiments towards England, even if it is sometimes displayed behind a facade of truculence which would not deceive a child, and the real success of the journey will depend on the treatment meted out to the travellers from their own people."

The "renowned hospitality" of Melbourne, Johannesburg, Montreal, Calcutta, etc., to people from the United Kingdom has not been returned here at home, the Times says, and that should be done, and urging clubs to open their doors to the visitors and thereby fill the travellers' intermediary hours with "healthy relaxation from the trying times of the Coronation ceremonies."

### Australia Represented

Government Establishing Diplomatic Representation in United States

The Foreign Office announced that the Australian Government is establishing diplomatic representation in the United States.

The announcement stated that the United Kingdom Government had agreed to the attachment of a member of the staff of the Australian Department of External Affairs to the staff of the British Ambassador in Washington with the rank of counsellor.

The first occupant of the post will be Frank Keith Officer, for the past three and a half years Australian External Affairs officer in London.

It was explained that Australia is adopting, with the necessary modifications, the system she has employed for more than 12 years for direct contact with the Foreign Office in London.

Sir George Pearce, Australian Minister for External Affairs, announced recently that Australians would be attached to four British legations abroad as diplomatic liaison officers. The Washington step is apparently the first move to carry out the plan.

Officer is 47 years old and unmarried. After graduating in law from the University of Melbourne, he was associated for some time with Mr. Justice Higgins. During the war he served with the Australian Forces, was mentioned in despatches four times, won the Military Cross and was made an Officer of the Order of the British Empire.

He: "It was very considerate of Jones to buy his wife a new washing machine."

She: "Sure was! The old one made so much noise he couldn't sleep."

Candy is popular in London. New confectionery stores open there at the rate of one a day.

### Canadians Best Arctic Fliers

Explorer Thinks They Are Well-Trained For Work

Future Antarctic expeditions will recruit their pilots in growing numbers from the ranks of Canada's hardy northern aviators, it is predicted by Alton Kenneth Innes-Taylor, famed Canadian explorer, who twice accompanied Richard E. Byrd on his historic journeys to Little America.

Constant training of Canadian pilots in cold-weather flying equips them superbly for the arduous work of South Pole exploration, Innes-Taylor said in Edmonton, on his way to Juneau, Alaska, in the course of an extensive biological survey.

Forced to fend for themselves in immense wildernesses, pilots flying in northern Canada develop great resourcefulness in addition to hardihood and complete technical mastery of their machines, the explorer said. For five years Mr. Innes-Taylor was with the Royal Canadian Mounted Police stationed on the Western Arctic.

Innes-Taylor, who along with several other members of the last Byrd expedition, will receive shortly the coveted Congressional Medal of Honor for his conspicuous contribution toward scientific knowledge of the earth's far places, spoke enthusiastically of the disinterested scientific motive which he said impels Byrd and similar men to carry out their arduous explorations.

"My own salary as a member of the last expedition, 1933 to 1935, was \$1 a year," he said.

### Conference On Human Life

Says Something Should Be Done To Combat Growing Inequality

Improvement of the "human stock" to combat the growing inequality rate is a problem which must soon be faced, Dr. R. C. Wallace, principal of Queen's University, Kingston, Ont., told the local Teachers' Institute at Ottawa.

"It was a delicate and difficult problem," he said. "We do not understand yet the laws of heredity. There are thresholds we cannot control. At the same time the little which can be done must be done if we are not to be submerged in this problem."

"It may be for our children to see the solution of such problems. All we can do is go forward courageously. The important thing is to have our faces in the right direction." Dr. Wallace suggested a conference on human life. Man had made remarkable progress in understanding natural phenomena but he understood very little of himself, he said.

### A Non-Magnetic Ship

Vessel For Scientists Will Carry Very Sensitive Instruments

For the study of sea phenomena the most expensive ship of her size ever built is taking on equipment in a corner of the East India Dock, London. The Research, as she will be called, will be only 650 tons, but will cost nearly \$500,000. She will sail the oceans with a crew of scientists who will investigate magnetic phenomena. The Research will be entirely non-magnetic, so that nothing will disturb the sensitive instruments on board. The ship is mainly of steel, with brass in places of iron and steel. The ship has bronze and other non-magnetic alloys. Even the cooking stoves will be of bronze, the buttons on the sailors' clothes and the rivets in their boots will be of bone or wood, and the cutlery will be non-magnetic.

### Questions Old Beliefs

Director Of Royal Ontario Museum Asks For Verification

Lecturing on "Un-natural History," Prof. J. R. Dymond, director of the Royal Ontario Museum, said that among the "old beliefs" he would like substantiated are the following: That the opossum plays dead. That the one aim of the bat is to get in somebody's hair. That warts come from handling toads. That horse-hair could turn into snakes.

That the mother snake protects its young by swallowing them. That the one aim of the bat is to get in somebody's hair. That warts come from handling toads. That horse-hair could turn into snakes.

That the mother snake protects its young by swallowing them.

That the one aim of the bat is to get in somebody's hair.

That warts come from handling toads.

That horse-hair could turn into snakes.

That the mother snake protects its young by swallowing them.

That the one aim of the bat is to get in somebody's hair.

That warts come from handling toads.

That horse-hair could turn into snakes.

That the mother snake protects its young by swallowing them.

That the one aim of the bat is to get in somebody's hair.

The best kind of help is self-help.

## Town Council and School Trustees

(Continued from Page 1)

Re additional street lights authorized at the Feb. 9 meeting, Constable Antel was instructed to arrange with the Water and Light Company to have these placed as quickly as possible.

Cr. Antrobus brought up the matter of construction of a new water reservoir, pointing out it would be advisable to have the work done this summer. This matter will be taken up later. Council adjourned at 9.30 p.m.

### SCHOOL TRUSTEES MEETING

The second meeting of the new board was held Friday, February 19, at 7.30 p.m. Present: G. Hope, chairman; W. Fraser, N. Fleming, P. Sharp, R. Greenhalgh. Was absent through illness.

Fraser-Fleming:—That letter re pupil's eyes submitted by Miss Milley be tabled for full meeting.

Fraser-Sharp:—That chairman and secretary be empowered to sign all cheques and banking documents.

On a discussion of securing the \$13,000 loan for the new building, the chairman reported having interviewed several, and the secretary had received some enquiries.

The secretary stated that as he would be out of the office at times during the period he was engaged in assessment work, he would like permission to engage a girl to answer enquiries at the office during his absence. The chairman stated he did not want to have girls employed, as there were married men out of work who could fill the bill, mentioning Ken Blain and S. B. Van Dusee.

Motion by Fleming-Fraser:—That Mr. Van Dusee be engaged to assist in the secretary's office. Motion carried, P. Sharp asking if the work could be shared so that K. Blain got a share.

The chairman asked if all men eligible had paid the poll tax. Trustee Fraser stated there were some who had not paid, and steps should be taken to collect.

On discussion as to sanding floor of the auditorium, decision was deferred till the next meeting, Trustee Sharp objecting to the additional expense unless it was necessary. There being no seconder to Fraser's motion, the matter was held over. Trustee Fraser stated the Works and Property committee would not spend money beyond that required for emergencies without the consent of the full board. On motion of Sharp-Fraser, the report on the sanding of the floor will be made at the next meeting.

Contractor D'Appolonia had suggested stands for clothes instead of wall pegs in the school office. Motion by Sharp-Fleming that prices be obtained on two stands.

Trustee Fraser asked if the installation of iron doors between the Central and the high school would lessen the insurance, as if it would not, then it was not necessary to go to the expense of \$55 for each door.

The purchase of 260 chairs from Bowen's Furniture Store for \$361.00 was reported.

Contractor D'Appolonia had requested the loan of the books and records of the clerk of the works, Harold Reid, the property of the board. Motion by Sharp-Fleming: That the books be loaned to the contractor. Carried.

The chairman stated that duties of janitors would be taken up and arranged. The meeting adjourned at 8.35 p.m.

### ANNOUNCEMENT

A. McVillie Anderson, eyesight specialist, of Calgary, will make his next visit to Coleman

### THURSDAY MARCH 4

at the jewelry store of J. M. Chalmers, Coleman.

Over 20 years experience and regular visits to this town assure you satisfaction in all optical work.

**WHITE BLOTTING PAPER**  
19 x 24 inches, for desk tops, 4 sheets for 25c. Single sheets 10c. Blotters, size 9 x 4 inches for office or school use, package of 24

Buy a chime clock at J. M. Chalmers' jewelry store.

## Local News

Edgar Thomas is in hospital to receive treatment for an infected finger.

Mr. and Mrs. Harold Reid left Tuesday morning for Los Angeles, where Mr. Reid will take a course in Diesel engineering.

N. H. Turnbull and P. Brockie, representing Alberta Paint & Glass Co., Calgary, were business callers on J. S. D'Appolonia on Wednesday.

The local Scott Fruit Co. branch will be sporting a new delivery truck just as soon as the road west is opened up. The truck is at present held at Cranbrook.

Mrs. Lily Fraser received word of the death of her sister Mrs. Annie Gray of Nova Scotia on Tuesday morning. Mrs. Gray had visited Coleman on many occasions and is known to many local people.

The regular meeting of the Canadian Legion was adjourned last Friday evening. Nomination of officers was to have taken place for the ensuing year, but the hockey game proved more attractive.

Government relief camps in this district have been placed under a contractor, a Mr. Reid, of Calgary. Camp foremen will retain supervision as formerly, and the same rates of pay, hours, etc., will be in force.

Mrs. A. Beveridge was hostess to a number of friends at a bridge party at her home on Friday evening. Prize winners were Mr. J. L. Lonsbury, Mrs. J. J. McIntyre, and Mrs. A. Anderson consolation. Four tables were in play.

## People's League of Alberta

Organized on Non-Political Lines  
With Temporary Provincial Executive Committee.

Alarmed over the trend of governmental affairs in Alberta, there has been organized a movement to unite all those who desire to establish stability in place of the present uncertainty prevailing throughout Alberta.

Temporary provisional committees have been appointed in the northern and southern sections of the province, in which a number of prominent business men are included, such as F. E. Osborne, former mayor of Calgary; John I. McFarland, and Dr. J. S. McEachern, of Calgary; W. E. Huckvale, Lethbridge; W. P. Roberts, Hanna; A. P. Hanley, Drumheller; J. S. Hunt, High River, and others from urban and rural areas.

Col. R. F. Barnes is the local representative of the party.

In a broadcast recently Dr. McEachern spoke very strongly on the need for a People's Party, in the following words:

"The situation demands of every man and woman, clear thinking and plain speaking. A force subversive of democracy and of Canadian and British institutions is active in Alberta today and wears as a mask 'Social Credit.'"

In an address recently reported in the Lethbridge Herald, Pat Lenihan, Communist leader in the Pass towns, told of travelling on the same coach as a delegation from the Crow's Nest Pass to a Social Credit convention in Edmonton, and he stated, from their talk, one couldn't have told they were different in their policies than the Communists. In fact one of them intimated to him that he thought they could all get together. Lenihan has been advising his followers to support Social Credit, possibly with the intention of repeating the old Communist tactics of boring from within.

### LADIES' AID TEA

### SUCCESSFUL VENTURE

The annual February tea and sale held by the ladies of the United church on Saturday afternoon was a real success. The ladies were, in view of the great amount of sickness among their own membership and in the community, rather doubtful of the success of the venture.

## Palace Theatre

Best Sound Effect — High Class Programs  
Nightly 8 p.m. Saturday 2 p.m., 7.30 p.m. and 9.30 p.m.

## Painting and Paperhanging Brightens All Indoors

Paint does more than protect and preserve. It brightens all indoors; makes the home a happier place to live in. So, why not renovate NOW? Let us give you an estimate on a painting and decorating job for a single room, a group of rooms or the whole house. TERMS ARRANGED.

**ANDY THORNBUR**  
MASTER PAINTER

But in spite of all the drawbacks the results of the afternoon were considerably in excess of the same effort in former years. All aprons and parcels were disposed of and more could have been sold had they been available. The tea tables were well patronized, as was the home-cooking. It is especially appreciated that some unable to attend sent gifts, also that some members of the group rose above their feelings and worked all through the afternoon. The good measure of success was a great encouragement in face of so many drawbacks. Thanks to all who helped are expressed.

Vegetarian  
Teacher: "Now, children, will some of you tell me what a herbaceous border is?"

Child (whose mother keeps a boarding house): "I know, teacher, a lodger who eats only vegetables."
